FENIGAL

Aero™ Balloon Lights

2 basic design options: either air-locked quiet design AERO FLEX or self-contained continuous air AERO (built-in fan blower). Aero Lighting Decoration has been used for special events, staged productions, live events, sporting events, commercial productions, television broadcast and architectural lighting.

It has various shapes, like column, cone, arch, sphere, star, lotus etc. to be floating on the water free-standing on the ground, which will help you create a variety of mesmerizing atmospheres with the colorful light illuminated from within. The envelope can be stuck with vinyl graphics of your logos, messages, designs and patterns, making them the perfect way to enhance your brand recognition at exhibits, product launches and marketing or promotional activity.
